

# Mikey's Quick Tips

# LPG Filling

- **Two quick tips**

# LPG Filling

- **Tare Weight + Product Weight + Filling Assembly = Full Cylinder Scale Weight**

# LPG Filling

- **Keep the Genie in the bottle!!**
- **Don't allow the employee to use the "spitter" valve**
- **You can't have a fire without the fuel**

- **Quick Review of Last Week's  
Quick Tip**

# See through the holes!

**Basically we have two main types of safety devices on 99% of our high-pressure cylinders**

- **Frangible Disc**
- **Fusible metal backed frangible disc**

**Remember Mikey's simple  
rule...see through the holes,  
nobody dies.**

# Quick Refresher From Past Weeks

# Hammer test all steel cylinders

# 4-year-old Oxygen Cylinder

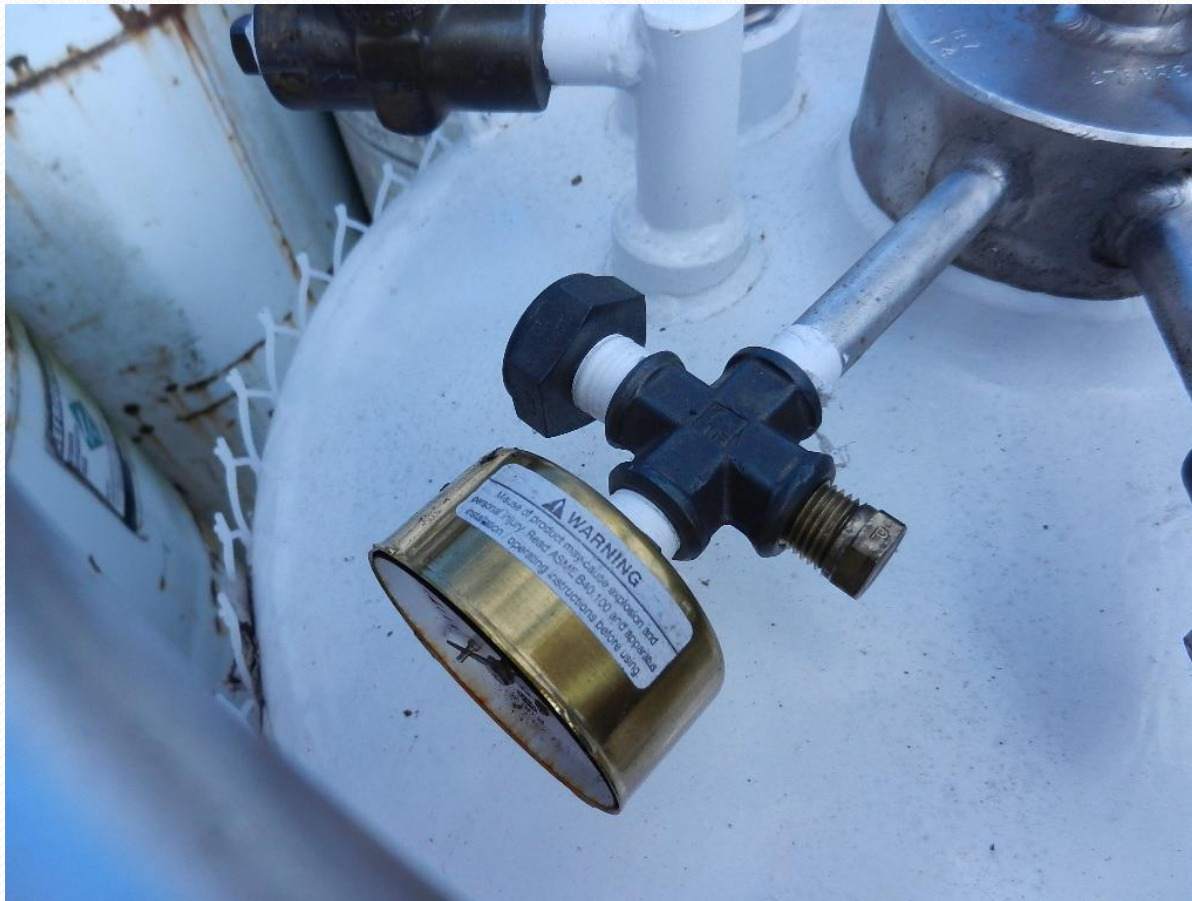

**Remember Mikey's simple rule...hammer test all steel cylinders, nobody dies.**

# Quick Refresher From Past Weeks

# Liquid Containers

**Note: Always make sure there is a **pressure relief device** and a **bursting disc** present on the container during the pre-fill inspection. Customers have been known to remove these.**
