

Mikey's Quick Tips

LPG Filling

- **Tare Weight + Product Weight + Filling Assembly = Full Cylinder Scale Weight**

LPG Filling

- **Keep the Genie in the bottle!!**
- **Don't allow the employee to use the "spitter" valve**
- **You can't have a fire without the fuel**

See through the holes

Hammer test all steel cylinders

Liquid Containers

Note: Always make sure there is a **pressure relief device and a **bursting disc** present on the container during the pre-fill inspection. Customers have been known to remove these.**

Liquid Containers

This Week's Quick Tip

Heat / Fire Damage to Cylinders

Heat Damage

Steel cylinders

- Heat damage to paint or coating
 - Smudge = OK
 - Discolored = OK
 - Blistered = OK
 - Burned away = Scrap

Aluminum cylinders

- 350 degrees
- Change of color on the heat indicating coating, melted plastic parts or decals
